

Environmental Policy

1. Policy Statement

At IMCA, we recognize the importance of conducting our business in an environmentally responsible manner. We are committed to minimizing the environmental impacts of our activities and contributing to sustainable development. By integrating environmental considerations into our decision-making processes and operational activities, we aim to meet and exceed relevant environmental laws and regulations.

2. Scope

This policy is in effect for all IMCA employees, facilities, and suppliers. It is designed to ensure that environmental sustainability is incorporated into every aspect of our operations, from product development to waste management and energy use.

3. Policy Details

IMCA is committed to the following environmental sustainability goals:

Compliance with environmental laws: We will adhere to all applicable environmental regulations and remain committed to the standards set by our partners and customers.

Employee engagement and training: We will foster environmental awareness and responsibility among our employees through training programs and internal communications, encouraging sustainable practices in daily operations.

Carbon Footprint Reduction: We aim to reduce our carbon footprint through energy saving precautions, encouraging the use of reusable energy sources, and improving energy efficiency within our operations.

Resource Efficiency and Waste Reduction: We actively put effort into minimizing the consumption of natural resources, reducing waste production, and maximizing recycling.

Sustainable Supply: We will prioritize supplying environmentally friendly products and services that have the least negative impact on the environment and people. Green technology will be utilized during facility renewals or construction of new ones.

Sustainable Supply Chain: We will collaborate with our suppliers and customers to promote sustainable practices throughout the value chain. We also expect our suppliers to adhere to the same environmental standards.

Biodiversity Conservation: We will support initiatives aimed at preserving biodiversity and protecting ecosystems in the areas where we operate.

Transportation and Mobility: We will encourage employees to adopt more environmentally friendly transportation options, including the use of hybrid or electric vehicles, and will explore the installation of electric vehicle (EV) charging stations at our facilities.

4. Management and Responsibility

The IMCA management team is responsible for ensuring that environmental risks and opportunities are effectively managed. Each department will play a role in implementing and maintaining IMCA's environmental policy, with regular evaluations conducted to ensure compliance and performance improvement.

5. Governance and Continuous Improvement

Environmental protection performance will be monitored and regularly reviewed by our Compliance team. The policy will be reviewed annually and updated as necessary to reflect evolving regulations, technology, and best practices.

6. Communication

This environmental policy will be communicated internally to all employees and externally to our stakeholders, including suppliers, customers, and local communities. We invite all our stakeholders to support our environmental objectives and contribute to building a more sustainable future.
